

Joint Information Center – JIC Release No. 1003

March 27, 2022, 4 p.m. (ChST)

Preliminary COVID-19 Test Results: Two New Cases, 18 Hospitalized

Preliminary COVID-19 Test Results: Two New Cases

Today, the Department of Public Health and Social Services (DPHSS) reported a preliminary case count of **two** new cases of COVID-19 from **70** specimens analyzed on March 26, 2022. Additional results from other clinics will be reported on Monday, March 28, 2022. To date, there have been a total of **47,080** officially reported cases, **340** deaths, **1,007** cases in active isolation, and **45,733** not in active isolation. Guam's COVID-19 Community Level is **MODERATE** based on the latest available data of new COVID admissions per 100,000 population (7-day total), percent of staffed inpatient beds occupied by COVID-19 patients, and new cases per 100,000 population (7-day total). Guam's Community Level utilizes the same [methodology as the U.S. Centers for Disease Control and Prevention \(CDC\)'s Community Levels](#).

18 Hospitalized for COVID-19

CENSUS as of 3 p.m.	GMH	GRMC	USNH	TOTAL
COVID-19 Admission	7	11	-	18
Pediatric Admissions	1	-	-	1
ICU	0	1	-	1
Ventilator	0	0	-	0

VACCINATION STATUS	VACCINATED	UNVACCINATED	INELIGIBLE (0-4 years old)
Hospitalized	10	8	0
Total in Population*	135,841	5,766	12,229
Rate per 100,000 Population	7	139	0

SPECIAL NOTE: Based on today's data, if we were to compare two (2) hypothetical populations of 100,000 people each, vaccinated versus unvaccinated, there would be 7 vaccinated people hospitalized for COVID-19 compared to 139 unvaccinated people hospitalized for COVID-19. The risk of being hospitalized for COVID-19 is about 20 times higher for the unvaccinated as compared to the vaccinated.

*Estimated population is based on DPHSS Immunization Program analysis of 2020 Census data. Updates are expected pending further Census 2020 data breakdown.

FREE COVID-19 VACCINATION CLINICS (AGES 5 AND OVER)
